

Illinois Latino Agenda 2.0 Statement on Redistricting

The Illinois Latino Agenda 2.0 (ILA 2.0) is a coalition that works to advance the economic, political, and social prosperity of the Latino community in Illinois. We have been closely following and advocating for increased representation of the Latino community commensurate with its population growth in the City of Chicago.

We are extremely disappointed that for the second consecutive decade Latinos have been shortchanged in their representation. Given the Latino community's contribution to the city's economic vitality and its neighborhood's social fabric, we are perturbed by the city council's looming decision on the final redistricting map. Moving forward our goal will be to organize and mobilize our community through increased voter registration and education efforts as we work towards equitable elected representation.
